

KNOLL Kuli/ Kuli shears
The transportation and uncoiling device for coils

Transportation assistant and uncoiling device: the KNOLL Kuli
 The original KNOLL Kuli for the picking up, transportation, uncoiling and accurate cutting of metal coils. Your ergonomic helper for the workshop and the construction site.

Transportation device
 The coil can be comfortably picked up.

Coil holder/ coil rail
 The coil holder is particularly indispensable for the transportation of small coils. An exact infeed of the coil, e.g. to the profiling device, is achieved with the lateral coil rail.

Length measuring device
 You can cut your metal sheet absolutely precisely with the Kuli shears and the length measuring device.

Turn your Kuli into your assistant: for transportation, uncoiling, cutting

KNOLL Kuli in two sizes

The Kuli is available for coils with widths of 100 and 125 cm.

Coil rail with
coil holder

device

Kuli Set

Kuli with coil rail and coil holder as well as with shears and length measuring device. Your versatile assistant is also available as a set in two different sizes.

TECHNICAL DATA

Kuli 100 weight	24 kg
Kuli 125 weight	28 kg
Load capacity coil max.	200 kg
Kuli coil rail 100	for coil widths up to 90 cm
Kuli coil rail 125	for coil widths up to 116 cm
Kuli shears	Al 1.0 mm Cu 0.8 mm, Zn 0.8 mm steel 0.7 mm
Length measuring device	centimeter increments

ADVANTAGES

You can cut your metal sheet free of burrs on the spot with the compact unit and patented Kuli shears. The roller cutters are maintenance-free and they ensure precise cutting with the linear leader. You do not need to take measurements with the Kuli Set at your side and so you are flexible and save time.

Technical changes are in the interest of progress!
